## **ACKNOWLEDGEMENT**

Any achievement does not depend solely on the individual efforts but on the guidance, encouragement and co-operation of intellectuals, elders and friends. A number of personalities, in their own capacities have helped us in carrying out this mini project work. We would like to take this opportunity to thank them all.

We would like to express our profound thanks to **Sri. G Dayanand,** Chairman, Sapthagiri College of Engineering Bangalore, for his continuous support in providing amenities to carry out this Mini Project.

Special Thanks to **Sri. Manoj G D,** Executive Director, Sapthagiri College of Engineering Bangalore, for his valuable suggestion.

Also we would like to express our immense gratitude to **Dr. H Ramakrishna**, Principal, and **Dr. M.H Annaiah**, Vice-Principal, Sapthagiri College of Engineering Bangalore, for his help and inspiration during the tenure of the course.

We also extend our sincere thanks to **Dr. Kamalakshi Naganna**, Professor and Head, Department of Computer Science and Engineering, Sapthagiri College of Engineering, for his constant support.

We would like to express our heartful gratitude to **Mrs. Madhushree**, Assistant professor, Department of Computer Science and Engineering, Sapthagiri College of Engineering, for her timely advice on the mini project and regular assistance throughout the work.

We also extend our sincere thanks to all the **Faculty members** and **supporting staff** Department of Computer Science and Engineering, Sapthagiri College of Engineering, for their constant support and encouragement.

Finally, we thank our parents and friends for their moral support.

UJJWAL KUMAR (1SG17CS095) SUDHAKAR MISHRA (1SG17CS091)

## **ABSTRACT**

"ONLINE HOSTEL MANAGEMENT SYSTEM" is software developed for managing various activities in the hostel. For the past few years the number of education institution is increasing rapidly. Thereby the number of hostels is also increasing for the accommodation of students studying in this institution. And hence there is a lot of strain on the person who are running the hostel and software's are not usually used in this context. This particular project deals with the problems on managing a hostel and avoids the problems which occur when carried manually. Identification of the drawback of the existing system leads to the design of computerized system that will be compatible to the existing system with the system which is more user friendly and more GUI oriented. We can improve the efficiency of the system, thus overcome the drawback of existing system.
